OVERVIEW

- Self-taught front-end development skills in HTML, CSS, Bootstrap, JavaScript, API's, accessibility and some back-end with node.js.
- Solidification of skills learned by assisting other web development students with solving their HTML, CSS and JavaScript questions and problems.
- Many years of computer usage, debugging, troubleshooting and programming have led to strong problem-solving skills and understanding of how to seek solutions.
- Keenness to learn and ability to find relevant resources results in quick learning of new concepts, languages or programs and adapt to new environments.
